

# MIO MICRA

## USER MANUAL

1. The luminaire shall be installed by a qualified electrician and wired in accordance with the latest IEE electrical regulations or the national requirements.
2. No supplied water-proof box, installation should be advised by qualified professional.
3. The external flexible cable can not be replaced. If the cable is damaged, the luminaire should be discarded.

## 1. DRAWING

## 2. INSTALLATION

### 1. Open a Mounting Hole

According to the required cut-out size, open a hole in the wall or panel, and pull out the power cable.

Note: The thickness of the wall or panel should not exceed 25 cm.

### 2. Connect the Power Cable

Insert one end of the power cable and one end of the fixture's power wire into the waterproof connector (IP67). Connect the wires properly, then tighten the waterproof connector. Make sure to leave enough cable length for future maintenance.

### 3. Place the Cable Inside

Arrange the long power cable neatly inside the opening in the wall or panel.

### 4. Insert the Fixture into the Hole

Pull back the buckles on both sides of the fixture, then insert the fixture into the mounting hole. The buckles will lock the fixture securely in place.
